Dallas, TX 75244

Profile

I'm a front end engineer who loves to create beautiful user interfaces and write clean code. I love working closely with UI and UX designers, and want to continue to make the web a better place.

Experience

Lead Software Engineer, Bottle Rocket; Addison, TX — 2014-Present
- Enhanced and maintained a large React/Redux e-commerce website
- Developed and maintained web applications using Angular
- Built multiple Chromecast receivers that allowed users to stream TV content
- Lead an initiative to begin unit testing and monitoring code coverage

UI Developer II, Fossil; Richardson, TX — 2013-2014
- Developed interactive and responsive content under tight deadlines
- Created Chrome extensions that aided with development and debugging
- Collaborated with other departments to create a better user experience

Web Developer, PAVLOV; Fort Worth, TX — 2012-2013
- Created interactive micro-sites that served the user
- Enhanced existing client sites by re-skinning and adding new features

Online Editor, The Shorthorn; Arlington, TX — 2010-2012
- Designed and built a weekly HTML email newsletter
- Hired and managed employees
- Planned and managed online-only content and projects
- Created interactive components for the primary website

Education

University of Texas at Arlington — Bachelor of Arts in Communication Technology, 2012
